Simone Lorenzi

Italian Patent Attorney, Professional Representative in Design matters before the EUIPO. Simone graduated in Biomedical Engineering from La Sapienza University of Rome.

Languages: Native Italian speaker, fluent in English

Areas of competence: Patents

Office: Rome

Work experience

Simone has been with Jacobacci & Partners since 2022. Prior to joining the firm, he worked as a biomedical engineer in the medical device sector, focusing on research and development of medical devices and systems, including product development and regulatory compliance activities. He also gained experience in applied research in magnetic resonance imaging for medical applications, in particular in the development and optimisation of imaging sequence algorithms.

Professional focus

Simone is involved in drafting and prosecuting patent applications, as well as in conducting patent searches, freedom-to-operate analyses and patentability assessments. He also handles the filing and prosecution of design applications at national, European and international level.

Areas of expertise

Simone mainly works on inventions in the fields of biomedical technologies and medical devices, as well as computer-implemented inventions, including software-related subject matter. He also has experience in industrial automation, automotive systems and electronics.
