

Héloïse Alberti-Segui

European Patent Attorney, Graduated from CEIPI with a specialization in «Patents of invention» Master II Automatic, Signal and Image Processing from Paris Saclay University (Master II ATSI) Graduate Engineer in Physics from the Institut d'Optique Graduate School (IOGS)

Lingue: native French speaker, fluent in English, knowledge of German

Aree di competenza:
Brevetti

Sede: Parigi

Work experience

Héloïse is a graduate engineer from the Institut d'Optique Graduate School (IOGS) and also holds a Master II in Automatic, Signal and Image Processing from the University of Paris-Saclay (Master II ATSI). During her studies, Héloïse worked at the Commissariat à l'Energie Atomique (CEA) on a project to validate a fisheye optic for velocimetric measurements and on the simulation of an X-ray source.

Héloïse started her career in industrial property in 2018 in a Parisian firm before joining Jacobacci & Partners in 2021.

Héloïse also graduated from CEIPI (mention «Patents of invention») in 2020.

Professional focus

Héloïse is fluent in French and European patent applications as well as international PCT applications, in French and English. She also handles the examination procedures associated with these applications and their extensions in various foreign countries.

Areas of expertise

Héloïse works in various fields of physics: optics, laser technology, biophotonics, image processing, signal processing, detectors, electronics, computing and mechanics.
